

1980 Editorial Index

PULP & PAPER

By: Subject • Company • Country • Author

Complete listings of all feature articles and news stories published in 1980 issues of PULP & PAPER. Article listings are by subject matter, by company, and by author. News stories are listed by company, and articles and news stories covering activities outside North America are listed under the name of the foreign country. (BG = Buyers Guide, November 15 issue.) Additional copies of this index may be obtained at \$5/copy from: PULP & PAPER 1979 Editorial Index, 500 Howard St., San Francisco, CA 94105

Index by Subject

Chemicals

Bleaching chemicals produced using salt, water	Oct 185
Bleaching expert discusses increased use of peroxide	Jan 156
Boiler water treatment series—corrosion protection	Jan 109
Chemical supply for Canadian pulp and paper industry	Oct 72
Chemical supply for U.S. pulp and paper industry	Oct 72
Chlorine dioxide is effective biocide in alkaline whitewater	Aug 140
Chlorine dioxide use—ways to cut costs, energy use	Oct 152
Combination chemical recovery maximizes pulping flexibility	Nov 119
How to optimize TMP peroxide bleaching	Nov 127
Metal chelants improve bleaching of TMP	Oct 108
Methanol recovery offers energy savings	Apr 171
Mutant bacteria used in wastewater treatment	Feb 172
Proper selection/use of defoamers	Mar 116
Regulations affect use, development of additives	Mar 68
Skim tank key to optimum CTO recovery	May 184
TMP brightness improved with hydrogen peroxide bleaching	Jun 156
World naval stores production is up; fails to meet demand	Dec 114

Coating/sizing

Adhesives/binders—listing of those currently in use	BG 15
Backwashing eliminated with self-cleaning strainer	May 161
Blade size press allows higher solids coating	May 130
Coated grades see no recession ahead	May 71
Coated paper capacity expansion at two Fabocart mills (Italy)	May 180
Coater control systems offer efficiency/flexibility	May 100
Coating conference looks at computer control, plastic pigments	Jul 160
Coating improved with fault-detection system	Feb 148
Improved techniques enhance quality, cut pigment loss	May 63
Paper pigments in high demand: some supplies short	May 124

Energy conservation

Air systems are source of energy savings	Apr 74
API reports industry nearing 1980 energy reduction target	Jun 134
Bark drying increases boiler efficiency, boosts cogeneration	Sep 80
Centrifugal vacuum system can reduce energy, water use	Dec 142
Chlorine dioxide use—ways to cut costs, energy use	Oct 152
Closed screening offers energy savings for TMP, kraft pulp	Jul 132
Coal-oil-water combination is potential lime kiln fuel	Aug 137
Comment—Cellulose and its bio-energy value	Dec 218
Comment—The case for materials recovery	Jun 276
Computer control cuts energy costs at Union Camp mill (Va.)	Feb 123
Computer system reduces boiler steam usage	Aug 97
Conversion of solid waste into fuel yields energy savings	Nov 105
Efficient turbine drives can reduce mill energy costs	Sep 170
Energy costs reduced through modified power, hog fuel use	Sep 191
Energy use reduced in dryer section	May 93
Flash dryers save fuel in lime kiln production	Feb 178
Former landfill material generates mill steam	May 129

Heat exchanger improves energy use, effluent treatment

May 160

May 150

High energy costs and consumption—what to do?

Apr 72

Improved boiler efficiency at Nekoosa Port Edwards

Sep 77

Lime kiln heat balance can reduce fuel consumption

Jul 186

Low-temperature dispersion system cuts steam energy use

Apr 171

Methanol recovery offers energy savings

Mar 165

Optimizing refiner operation

Jun 76

Pressurized grinding offers energy savings

Sep 164

Production decrease saves energy, sustains profits

Jan 160

Reducing energy consumption in a dryer section

Aug 143

Reinjected cinders increase hog-fuel-fired boiler efficiency

Jun 186

Swedish mill saves energy, production costs with "steam dryer"

Dec 68

Two-stage batch digester steaming reduces energy use

May 33

Washington Viewpoint—Windfall energy savings

Engineering

May 160

Heat exchanger improves energy use, effluent treatment

May 150

High energy costs and consumption—what to do?

Apr 72

Improved boiler efficiency at Nekoosa Port Edwards

Sep 77

Lime kiln heat balance can reduce fuel consumption

Jul 186

Low-temperature dispersion system cuts steam energy use

Apr 171

Methanol recovery offers energy savings

Mar 165

Optimizing refiner operation

Jun 76

Pressurized grinding offers energy savings

Sep 164

Production decrease saves energy, sustains profits

Jan 160

Reducing energy consumption in a dryer section

Aug 143

Reinjected cinders increase hog-fuel-fired boiler efficiency

Jun 186

Swedish mill saves energy, production costs with "steam dryer"

Dec 68

Two-stage batch digester steaming reduces energy use

May 33

Washington Viewpoint—Windfall energy savings

May 33

Engineering

BG 48

A.C. drives give motors a.c. advantages, d.c. control

BG 62

A.C. helper motors used at idler rollers

Dec 96

Bark dryer cuts fuel oil use, improves boiler efficiency

Sep 80

Bark drying system increases boiler efficiency, cogeneration

Sep 188

Barker rebuild cuts maintenance costs, downtime

BG 50

Boiler baghouse efficiency is improved with modifications

BG 50

Boiler water treatment series—corrosion protection

Jan 109

Ceramic coating extends life of paper machine components

Jun 163

Closed screening offers advantages for TMP, kraft pulp

Jul 132

Coal dust effectively checked by wet suppression

Oct 157

Computer system reduces boiler steam usage

Aug 97

Consolidated's new kraft furnace increases production

Jul 82

Construction contracts: criteria and alternatives

Sep 74

Corrosion in heat exchanger tubing reduced using special alloy

Sep 200

Demineralizer system reduces boiler maintenance costs

Jun 182

Disposable chipper knife used in Scandinavia

Feb 181

Efficient turbine drives can reduce mill energy costs

Sep 170

Effluent pumping problems solved at Brunswick (Ga.)

Jul 189

Energy, design economics discussed at engineering meeting

Jan 152

Energy savings in dryer section

Jan 160

Evaporator scaling research at IPC/Westvaco

Mar 156

Former landfill material used to generate steam (Wash.)

May 129

Fox River saves wastewater surcharges with strainer

Mar 139

Galvanized coatings are cost-effective for mill structural steel

Sep 130

Good system design is best preventive maintenance

Mar 162

Grooved rolls replace first press suction rolls

Jun 104

Heat exchanger improves effluent treatment, energy use

May 160

Hog-fuel-fired boilers aided by reinjection of cinders

Aug 143

Hog fuel, power usage modification reduces energy costs

Sep 191

Insulation of dryer heads is profitable for mill

Oct 184

ITT raises digester capacity

Jun 106

Kiln maintenance costs cut with reinforced castables

Nov 154

Lubricating plain bearing on older paper machines

Dec 24

Lubrication—applications of solid-film lubricants

BG 27

Maintenance survey: current trends in mill maintenance

Dec 108

Mechanical ash-handling vs pneumatic/hydraulic systems
 Metering pumps—guidelines for design selection
 Modified ultrasonic flowmeter measures pipe liquid velocity
 Nekoosa improves boiler efficiency at Port Edwards
 Noise-abatement program improves woodyard conditions
 Optimum refining with less energy—principles and design
 Pipe-replacement costs can be cut with use of right alloy
 Polyvinylidene coating protects felt rolls from corrosion
 Proper lubrication can extend bearing life
 Recovery operations improve as result of testing residual alkali
 Refiner packing life extended through use of synthetic seals
 Refiners use in-line transmitter for freeness control
 Safety-awareness campaign can prevent warehouse accidents
 Safety management techniques for supervisors
 Scandinavia lowers energy use; U.S. mills can benefit also
 Sludge basins cleaned automatically
 Small-motor maintenance—how to prolong motor life
 Sonic sootblower can help maintain recovery boiler efficiency
 Starch cookers improved with special heaters
 Swedish mill utilizes "steam dryer" for energy savings
 Trouble-free operation of doctors—Part 1
 Trouble-free operation of doctors—Part 2
 Unique Converflo headbox improves sheet surface at L-P
 Using air-powered diaphragm pumps to reduce downtime
 Valve repairs cut mill maintenance time and costs
 Vibration analysis program can prevent equipment failures
 Vibration-monitoring program cuts downtime at Scott Paper
 Welded-steel chain saves repair, maintenance of kiln drag chain
 Well-designed skim tank is key to optimum CTO recovery
 Wood storage tank for sulfite pulp installed at Publishers

Environmental control—air/water quality

Comment—Clean Air Act: problems with PSD
 Comment—EPA turning new source review on its head
 Computer system reduces boiler steam usage
 Effluent pulping problems solved at Brunswick (Ga.)
 Engineering consultant examines environmental legislation
 Green Bay Packaging uses baghouse for particulate removal
 Hazardous waste regulations guidelines
 Hazardous waste regulations, superfund topics at forum
 Hazardous waste regulations—their impact on paper industry
 Heat exchanger improves effluent treatment, energy use
 Industry nearing EPA guidelines for air/water quality
 Menasha closes whitewater system/meets effluent standards
 Methanol recovery offers energy savings
 Mutant bacteria used in wastewater treatment
 Oxygen bleaching—economics of O₂ bleaching,
 biological treatment
 Oxygen bleaching—industry expert examines O₂ potential
 Oxygen bleaching may be able to reduce effluent problems
 Review of current technology used in monitoring emissions
 Secondary treatment systems online at G-P Bellingham
 Sludge-disposal costs reduced with land-application program
 Solid waste is converted to fuel at Abitibi-Price mill
 TAPPI environmental conference focuses on compliance
 Washington Viewpoint—BCT and EPA
 Washington Viewpoint—Blum's blundering
 Washington Viewpoint—Environment and the election
 Washington Viewpoint—Industry may get cleanup tab
 Washington Viewpoint—Regulating on a clear day
 Washington Viewpoint—Unfinished business
 Waste treatment facilities upgraded at Scott (Ala.)

Expansion/modernization

Abitibi rebuilds barker, reduces costs, downtime (Mich.)
 API surveys future industry growth
 Bear Island newsprint mill comes on-line
 Bowater Southern operates largest newsprint
 mill in North America
 CFI's expansion ups linerboard capacity (Ga.)
 Champion's Courtland expansion sees near-flawless startup
 Consolidated-Bathurst completes expansion at newsprint mill
 Consolidated's new kraft furnace increases production
 Consolidated starts up new machine at Whiting
 Diamond International's recycled fiber boxboard mill on-line
 Fraser expands printing paper capacity (Maine)
 G-P Bellingham mill brings secondary treatment systems on-line Jul 180
 G-P's new tissue machine raises capacity 50% (N.Y.) Oct 126
 Great Northern rebuilds printing paper machine (Maine) Oct 123

 Construction contracts: criteria and alternatives Jan 220
 Corrugated box shipments decline after four-year rise Sep 74
 Corrugated box shipments to rise 3.0% in 1981 Jul 129
 CPPA annual meeting focuses on sulfonation Dec 98
 Electronic publishing—its impact on paper industry Apr 152
 Environmental forum looks at waste regulations, superfund Oct 85
 Evaluation of productivity, operating costs of finishing Sep 134
 Good system design is best preventive maintenance Jun 188
 Grade profile—Bleached paperboard Mar 162
 Grade profile—Coated groundwood publication papers Aug 39
 Grade profile—Construction paper and board May 31
 Grade profile—Corrugating medium Nov 37
 Grade profile—Linerboard Jun 39
 Feb 37

Grade profile—Newsprint	Jan 37	Chemimechanical pulp—option for Canadian newsprint industry	Jun 70
Grade profile—Paper-grade chemical market pulp	Sep 41	CLO ₂ effective biocide in alkaline whitewater systems	Aug 140
Grade profile—Recycled boxboard	Jul 37	Closing whitewater system helps meet effluent standards	Mar 60
Grade profile—Tissue	Apr 39	Con-Bath first in Canada to use three twin-wire wet ends	Feb 70
Grade profile—Uncoated groundwood printing grades	Oct 41	Consolidated's new LWC paper machine at full production	Aug 93
Grade profile—Uncoated printing/writing	Mar 35	Couch press improves quality, runability of medium machine	Sep 107
Growth of aluminum-metallized papers seen	Jan 108	Diamond International's recycled boxboard mill starts up	Jul 74
Guide to EPA's new hazardous waste regulations	Nov 144	Dryer section changes reduce energy requirements	Jan 160
Hazardous waste regulations—impact on paper industry	Jul 104	Dry forming—history and technology	Apr 120
Industry consultant examines environmental legislation of '70s	Jan 135	Economic advantages found in air-drying board	Apr 177
Industry nearing EPA guidelines for air/water quality	May 120	European boardmakers stress pressing efficiency	Apr 99
Industry strength discussed at API Paper Week	Apr 103	Fine-tune consistency control system for best performance	Mar 134
Labor bargaining in 1980 reviewed at API/FBA conference	Feb 35	Fraser rebuild directed toward groundwood printing grades	Sep 102
Labor/Management—1980 bargaining	Jun 37	G-P's new tissue machine raises capacity 50% (N.Y.)	Oct 126
Labor/Management—Legislative 'iceberg' of the 1980s	Feb 35	Grade profile—Bleached paperboard	Aug 39
Labor/Management—Productivity No. 1 goal	Aug 37	Grade profile—Coated groundwood publication papers	May 31
Labor/Management—Scenario for tomorrow	Apr 37	Grade profile—Construction paper and board	Nov 37
Labor/Management—The productivity option	Oct 39	Grade profile—Corrugating medium	Jun 39
Labor/Management—Whatever happened to Horatio Alger?	Dec 35	Grade profile—Linerboard	Feb 37
Labor/Management—workforce 'discontinuity'	Jun 99	Grade profile—Newsprint	Jan 37
Longwood transpor calls for new equipment, regulations	Mar 140	Grade profile—Paper-grade chemical market pulp	Sep 41
Mill communications—a cartoonist's view	Feb 155	Grade profile—Recycled boxboard	Jul 37
Newspaper supply/demand imbalance examined	May 71	Grade profile—Tissue	Apr 39
No U.S. recession seen for coated printing/writing grades	Jan 82	Grade profile—Uncoated groundwood printing grades	Oct 41
Outlook 1980—Cartoon review	Jan 86	Great Northern rebuilds printing paper machine (Maine)	Mar 35
Outlook 1980—Increasing costs, prices—decreasing profits	Jan 72	Green Bay's decreased production saves energy, is profitable	Oct 123
Outlook 1980—Industry execs discuss challenges of recession	Jan 84	Grooved rolls replace first press suction rolls	Sep 164
Outlook 1980—Labor contracts fill calendar	Jan 76	Growth of aluminum-metallized paper seen	Jun 104
Outlook 1980—Slow economy affects paper supply	Jul 70	Insulation of dryer heads is profitable for mill	Jan 108
Overseas demand competes for U.S. wastepaper supplies	Aug 121	K-C's fluff pulp expansion at Coosa Pines	Oct 184
Printing/writing paper sees increased demand, competition	Jun 109	Largest newsprint mill on-line at Bowater Southern	Jun 128
Pulpwood harvests suffering due to spruce budworm	Aug 75	L-Pinstalls unique Converflo headbox, improves sheet surface	Feb 73
Rail decontrol, rising costs of concern to industry	Mar 142	MB's Port Alberni modernization improves liner production	Jun 82
Reduce losses from storage area fires	Mar 68	MB upgrades core manufacture at Powell River	Sep 110
Regulations may deter chemical development, use	Dec 118	Method for evaluating productivity, operating costs of finishing	Dec 58
Safety-awareness campaign can prevent warehouse accidents	Sep 166	Midtec completes \$85-million expansion (Wis.)	Jun 188
Safety management techniques for supervisors	Sep 160	Modern presses reduce breaks at high speeds	Nov 94
Slow industry recovery anticipated in 1981, better in 1982	May 155	Multifourdrinier produces high-quality, specialty papers	Jul 77
TAPPI annual meeting on paper supply, raw materials	Jul 160	Multi-ply board production costs lower using control system	Feb 78
TAPPI coating conference covers computer control, pigments	Nov 124	New screen improves chip quality at Fiskeby AB	Feb 101
TAPPI engineering conference focuses on design, energy	Dec 140	New SymFormer fine paper machine at Nekoosa	Jun 73
TAPPI finishing conference focuses on sheeting	Jun 163	New technique controls cross machine moisture profiles	Apr 126
TAPPI papermakers look at energy reduction, additives	Nov 72	100% TMP newsprint mill starts up (Va.)	Apr 174
Timberland investment critical to improving profitability	Jun 79	Optical flow transmitter offers advantages over magnetic	Apr 65
Trucking regulations confuse wood transportation outlook	Mar 37	Papermakers' sign language—a cartoonist's review	May 69
Washington Viewpoint—Future shock	Nov 39	Potlatch brings new tissue machine on-line at Lewiston	Mar 140
Washington Viewpoint—Gutting regulatory reform	Feb 39	Progress of pressurized grinding	Dec 88
Washington Viewpoint—Parading regulatory reform	May 33	Proper use of defoamers yields cost-effective foam control	Jun 76
Washington Viewpoint—Windfall energy savings	BG 53	Single-felting in dryers increases production at BCFFP	Mar 116
Worker safety—how to select a breathing-air system	Dec 114	Spectrophotometer helps maintain color on-line	Apr 96
World naval stores production is up; fails to meet demand	Aug 88	Steam box increases sheet temperature, improves drainage	May 66
World Review—A look at China's paper industry	Aug 112	Strobe lights help solve formation problems	May 158
World Review—Australian industry growth prospects	Aug 64	Supercalenders—design/operation developments	May 186
World Review—Difficult period expected in the '80s	Aug 115	Testliner machine uses 100% wastepaper at French mill	May 126
World Review—New Zealand industry strong		Total performance analysis of board, medium machines	Mar 66

Meetings/conferences

API/FBA conference looks at labor bargaining in 1980	Apr 103
API/NFPA environmental conference looks at regulations	Sep 134
API Paper Week discussions center on strength of industry	May 120
Canada's paper market share vs wood shortage	May 178
CPGA annual technical meeting covers broad range of subjects	Apr 152
CPGA expresses optimism for 1980	Apr 155
FBA meeting told corrugated box shipments to rise in 1981	Dec 98
Financial Analysts seminar predicts paper recovery in 1981	Sep 160
Naval stores meeting—production, CTO fractionation	Dec 114
TAPPI annual looks at supply, raw materials, conservation	May 155
TAPPI coating conference covers computer control, pigments	Jul 160
TAPPI engineering conference focuses on design and energy	Nov 124
TAPPI engineering focuses on energy, design economics	Jan 152
TAPPI environmental conference focuses on mill compliance	Jul 183
TAPPI finishing conference focuses on sheeting	Dec 140
TAPPI papermakers discuss energy reduction, additives	Jun 163

Papermaking/boardmaking

Air systems are source of energy savings	Apr 74
Centrifugal vacuum systems can reduce energy, water use	Dec 142
CFI ups board output by 75 tpd	Jan 102
Champion's new fine paper machine starts up at Courtland	Jul 94

Chemimechanical pulp—option for Canadian newsprint industry	Jun 70
CLO ₂ effective biocide in alkaline whitewater systems	Aug 140
Closing whitewater system helps meet effluent standards	Mar 60
Con-Bath first in Canada to use three twin-wire wet ends	Feb 70
Consolidated's new LWC paper machine at full production	Aug 93
Couch press improves quality, runability of medium machine	Sep 107
Diamond International's recycled boxboard mill starts up	Jul 74
Dryer section changes reduce energy requirements	Jan 160
Dry forming—history and technology	Apr 120
Economic advantages found in air-drying board	Apr 177
European boardmakers stress pressing efficiency	Apr 99
Fine-tune consistency control system for best performance	Mar 134
Fraser rebuild directed toward groundwood printing grades	Sep 102
G-P's new tissue machine raises capacity 50% (N.Y.)	Oct 126
Grade profile—Bleached paperboard	Aug 39
Grade profile—Coated groundwood publication papers	May 31

Great Northern rebuilds printing paper machine (Maine)	Oct 123
Green Bay's decreased production saves energy, is profitable	Sep 164
Grooved rolls replace first press suction rolls	Jun 104
Growth of aluminum-metallized paper seen	Jan 108
Insulation of dryer heads is profitable for mill	Oct 184
K-C's fluff pulp expansion at Coosa Pines	Jun 128
Largest newsprint mill on-line at Bowater Southern	Feb 73
L-Pinstalls unique Converflo headbox, improves sheet surface	Jun 82
MB's Port Alberni modernization improves liner production	Sep 110
MB upgrades core manufacture at Powell River	Dec 58
Method for evaluating productivity, operating costs of finishing	Jun 188
Midtec completes \$85-million expansion (Wis.)	Nov 94
Modern presses reduce breaks at high speeds	Jul 77
Multifourdrinier produces high-quality, specialty papers	Feb 78
Multi-ply board production costs lower using control system	Feb 101
New screen improves chip quality at Fiskeby AB	Jun 73
New SymFormer fine paper machine at Nekoosa	Apr 126
New technique controls cross machine moisture profiles	Apr 174
100% TMP newsprint mill starts up (Va.)	Apr 65
Optical flow transmitter offers advantages over magnetic	May 69
Papermakers' sign language—a cartoonist's review	Mar 140
Potlatch brings new tissue machine on-line at Lewiston	Dec 88
Progress of pressurized grinding	Jun 76
Proper use of defoamers yields cost-effective foam control	Mar 116
Single-felting in dryers increases production at BCFFP	Apr 96
Spectrophotometer helps maintain color on-line	May 66
Steam box increases sheet temperature, improves drainage	May 158
Strobe lights help solve formation problems	May 186
Supercalenders—design/operation developments	May 126
Testliner machine uses 100% wastepaper at French mill	Mar 66
Total performance analysis of board, medium machines	Oct 129
Trouble-free operation of doctors—Part 1	Apr 146
Trouble-free operation of doctors—Part 2	May 188
Troubleshooting—A look at supercalender problems	Apr 124
Troubleshooting—Preventing paper machine problems	May 90
Troubleshooting—Supercalendering guidelines	Jul 164
Winder selection simplified, better results seen	Jul 154
World Review—A look at China's paper industry	Aug 88

Process control

Accurate moisture measurement of frozen chips	Jun 136
Coater control systems must be flexible, efficient	May 100
Computer control cuts energy costs at Union Camp	Feb 123
Computer control reduces energy usage in dryer section	May 93
Fault-detection system improves coating quality	Feb 148
Fine-tune consistency control for maximum performance	Mar 134
High-intensity strobe lights help solve formation problems	May 186
ITT Rayonier's computer study raises digester capacity	Jun 106
Low energy consumption in Scandinavia can be lesson to U.S.	May 150
Microelectronics offer practical applications	Feb 151
New technique to control cross-machine moisture profiles	Apr 174
Optical flow transmitter improves process control	May 69
Process control system cuts multi-ply production costs	Feb 101
Refiners use in-line transmitter for freeness control	Feb 128
Refractometer measures green liquor density	Feb 80

Pulp processing

Accurate moisture measurement of frozen chips	Jun 136
Alcohol pulping feasible on small scale	Aug 144
Bale scales, moisture measurement improve pulp moisture	Oct 178
Bin activator increases flow from chip storage silo at MB	Jun 162
Bleached-pulp cleaning improvement program at Tahsis	Mar 96
Bleaching of TMP improved with metal chelants	Oct 108
Calcasieu tests residual alkali; improves recovery operations	Jun 191
Chemimechanical pulp in the Canadian newsprint industry	Jun 70
CIO, mixer improves pulp quality at BCFP Crofton	Mar 119
Coal-oil-water as lime kiln fuel	Aug 134
Combination chemical recovery maximizes pulping flexibility	Nov 119
Cost-effective makeup chemicals in kraft recovery	Mar 160
CTO value increases pulp recovery efforts	Feb 130
Flash dryers boost lime kiln production, save fuel	Feb 178
